

# Oh Baby!

*Having a baby is one of the most exciting times in your life.*

## Obstetrics and Prenatal Care

One of the most important decisions for a mom-to-be is deciding who your healthcare partners will be when your bundle of joy arrives. When it comes to choosing your doctor, you do have a choice! Why not choose one that is a good fit for you?

Dr. Sohnen or Dr. Kay will personally oversee all of your prenatal visits, and rest assured, on your special delivery day, a doctor will be with you. We are dedicated to our patients and believe that you are entitled to see a doctor on every visit. This sets us apart from other providers in this area, and it is our belief that this results in better healthcare and satisfaction for our patients.

Pinnacle Women's Health Center is committed to providing the highest quality care, and will strive to make your pregnancy as stress-free as possible.
